

BMP Systems Inc. began in 1968 in Du Bois, Pa. We are an family owned and operated office equipment dealer. Our business was built upon a business philosophy that their clients are treated like we would treat our own family. Our team here at BMP Systems has over 100 years combined experience in the office equipment industry. We strive to find ways that we can save your business money. There is a multiple of ways that we can accomplish this; recommending compatible supplies for you current equipment; recommending a larger multifunction device that cost less per page than your current devices; and/or a combination of both products. To help you see where we can save you money, we offer a free analysis of how much you are currently spending to print with your current devices and what we would recommend to bring those costs down. It isn't uncommon to be able to save customers around \$100 a month, and that is only printing about 5,000 sheets a month. Our Better Business Bureau (BBB) rating is A+.

BMP Systems Inc. offers service on Calculators, Cash Registers, Computers, Copiers, Dot Matrix Printers, Fax Machines, Laser Printers, Paper Shredders, Time Clocks and **Typewriters**. Parts for most of the products we service take only one business day to arrive at our office, this helps us keep your office running. BMP also offers a full line of supplies for all of the items we service, this includes paper rolls, ink rollers, ribbons, toners, drums, time cards, shredder bags and etc. Another item we offer is compatible toner cartridges and drum units for most Copiers, Fax Machines and Laser Printers on the market today. We have been able to save our customers up to 60% over the cost of OEM toners and drums.

BMP Systems Inc is also your local Authorized Dealer of the Canon copier line. We can provide your business with a full line of printers and copiers to fill any of your needs. BMP also offers affordable leasing options thru Canon Financial Services with lease terms from 12 months up to 63 months on both our new and used equipment. Along with our leasing options we also offer service contracts that cover all your parts, labor, service calls, toner and drums. Our service contracts have no minimum usages, billing fees or documentation fees, unlike most of the other copier dealers.

Another area that BMP is different from other dealers is that when we proposal a new machine our machine is 100% new. Some of our competitors will say a machine is new, when in fact if you read the fine print the machine does include used/refurbished components. When you buy a used copier from BMP we will let you know the copy count on the unit that is being proposed.

We are always here to answer any questions you may have, even if you didn't purchase the equipment from us! Our phone number is below, so if you have any questions please do not hesitate on giving us a call!

**Canon has just announced to the dealers a credit that is now available to members of National Association of Bar Executives (NABE).**

**BMP is also a Brother Authorized Service Center**
